

NPQ Summative Assessment windows

Please see below the Summative Assessment windows for the remainder of Cohorts 1 to 4.

Please note that some of these dates are indicative, and subject to change until the DfE appointed external moderator has confirmed dates for the moderation process. However, we do not anticipate the dates below will change significantly.

We ask that you please use these indicative windows as a guide to carefully monitor participant engagement on the Online Learning Platform to ensure participants are on track to be eligible to complete their Summative Assessment. Participants must complete 90% of their course (as measured by activity credits) in order to be eligible to complete the Summative Assessment. Delivery Partners can view and track participant % course completion at any time via the 'Engagement' report available on the Online Learning Platform.

Please see below a summary list of all upcoming Summative Assessment windows. Beyond this, you will find some additional detail for each window including when the 90% course engagement will be measured and when communications will be sent to the relevant participants.
